

## Comparing your Boards performance

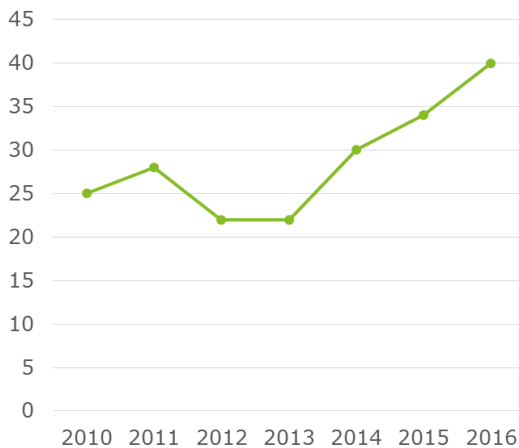

By tracking new board appointments on a monthly basis, the *Australian Institute of Company Directors (AICD)* has recorded the percentage of female non-executive directors on ASX 200 boards. Whilst the percentage of women on boards is slowly increasing, we are a long way off achieving gender parity. A total of *twenty* boards in the ASX 200 still do not have any women on them.

The latest percentage of women on ASX 200 boards is 23.4% . This is a substantial increase from 2009, but is still well below 50:50 gender parity on boards.

**Percentage of female directorships on ASX 200 boards**

**Proportion of women comprising new ASX 200 board appointments**

The proportion of women comprising new appointments increased significantly from a low base of 8.3% in 2009.
