POLICY STATEMENT

Title: Assessing and responding to self-harm and suicide risk
Policy No. CPD605-2

Policy Statement:
The Department of Communities, Child Safety Services (Child Safety Services) will promote the safety, well-being and best interest of children and young people through the implementation of effective and culturally appropriate self-harm and suicide risk management practices.

Principles:
- The safety, wellbeing and best interests of children and young people are paramount.
- Children and young people have a right to be safe and protected from harm.
- Child Safety Services staff take seriously all acts of self-harm, including suicidal threats and gestures.
- Safety and risk assessment are fundamental components of effective service delivery for children and young people.
- Children and young people in the custody or guardianship of the chief executive have the right to access the medical and therapeutic services necessary to address their risk of self-harm and/or suicide.

Objectives:
This policy aims to ensure that:
- children and young people who demonstrate or have demonstrated any self-harming or suicide risk behaviours, are responded to in ways that safeguard their immediate safety to the extent possible in the circumstances; prevent harm from occurring or reduce the risk of harm; and promote their ongoing well-being by addressing harmful behaviours and underlying causes
- risk factors, warning signs and cultural considerations are taken into account when assessing and responding to self-harm or suicide risk
- Child Safety Service Centre (CSSC), Child Safety After Hours Service Centre (CSAHSC) and the Regional Intake Service staff are provided with information and procedures about assessing and responding to self-harming or suicidal behaviours
- all children and young people subject to a self-harm alert or suicide risk alert have a corresponding self-harm or suicide risk management plan.
Scope:
This policy relates to children and young people across all child protection phases, including:

- intake, where the child or young person is the subject of an intake enquiry or child concern report when self-harm or suicide risk is part of the presenting problem
- investigation and assessment, when a child or young person is subject to a notification and an investigation and assessment is undertaken (including temporary assessment orders and court assessment orders)
- ongoing intervention through a support service case, intervention with parental agreement (IPA) or a child protection order (including interim orders granting custody or guardianship to the chief executive).

In addition to assessing and responding to self-harm and suicide risk, this policy will be implemented in conjunction with Child Safety Services procedures for Critical Incident Reporting which stipulates:

- attempted suicide by a child or young person subject to current statutory intervention is a level 2 critical incident
- significant self-harming behaviours (i.e. not assessed as a suicide attempt) where medical treatment/admission to hospital of a child or young person is required is a level 2 critical incident.

Following the provision of a level 1 critical incident report in relation to the death of a child or young person known to the Department, any further action and/or requests for information will be coordinated by the Complaints, Case Review and Investigation Branch – refer to Child Death Case Review Policy and Procedures (361).

Roles and Responsibilities:
The roles and responsibilities of Child Safety Services staff in relation to assessing and responding to self-harm and suicide risk are outlined in the Child Safety Practice Manual, chapter 10.19, 10.20 and associated practice resources.

Authority:
Child Protection Act 1999, sections 5, 6, 7, 74, 97, 122.
